1. Company Overview

Kranthi Elevators is a trusted provider of advanced elevator solutions, committed to delivering safety, quality, and innovation in every project. The company specializes in designing, manufacturing, and installing elevators that meet the evolving needs of residential, commercial, and healthcare spaces.

Key facts about Kranthi Elevators:

- Focus on precision engineering and modern technology to ensure smooth performance, long-lasting durability, and maximum passenger comfort.
- Every solution is carefully customized to suit the structure, space, and requirements of the client.
- Team of experienced professionals bringing technical expertise and dedication to every stage — from planning and installation to maintenance and support.
- Company philosophy: an elevator is not just a machine, but an essential part of everyday convenience and building functionality.
- Customer satisfaction is positioned as the core of everything the company does.
- Serves residential, commercial, and healthcare (hospital) segments in and around Hyderabad.

2. Products Offered

Kranthi Elevators offers 4 core product lines:

- 1. Passenger Lift
- 2. MRL Lifts (Machine Room Less Lifts)
- 3. Hydraulic Lifts
- 4. Hospital Bed Lifts

Each is detailed below.

2.1 Passenger Lift

Kranthi Elevators Passenger Lifts are designed to provide safe, smooth, and comfortable vertical transportation in residential and commercial buildings. Built with quality components and modern technology, these lifts ensure reliable performance, low-noise operation, and long-lasting durability. They are ideal for daily use, offering convenience, efficiency, and a pleasant travel experience for passengers.

Features

- Smooth and silent operation
- Modern cabin design
- Energy-efficient system
- Advanced safety features
- Customizable options

Specifications

- Capacity: 4–20 Persons

- Speed: 0.5 to 2.0 m/s
- Door: Automatic / Manual

Applications

- Apartments
- Offices
- Shopping complexes
- Hotels

Safety

- Emergency alarm
- Overload protection
- Door sensors
- Power backup

2.2 MRL Lifts (Machine Room Less Lifts)

Kranthi Elevators MRL Lifts are designed to provide efficient and space-saving vertical transportation without the need for a separate machine room. Using advanced technology, all major components are integrated within the lift shaft, making them ideal for modern buildings with limited space. These lifts offer smooth performance, energy efficiency, and reduced construction cost while maintaining high safety standards.

Features

- No separate machine room required
- Space-saving design
- Smooth and quiet operation
- Energy-efficient system
- Low maintenance

Specifications

- Capacity: 4–16 Persons
- Speed: 0.5 to 1.75 m/s
- Door: Automatic

Applications

- Residential apartments
- Small commercial buildings
- Modern constructions

Safety

- Emergency alarm
- Overload protection
- Door sensors
- Automatic rescue device (ARD)

2.3 Hydraulic Lifts

Kranthi Elevators Hydraulic Lifts are designed for reliable and efficient performance, especially in low-rise buildings. These lifts use hydraulic technology to ensure smooth lifting with strong load capacity and stable operation. They are a cost-effective solution, easy to install, and ideal for applications where high speed is not required. Built with quality components, they offer durability and consistent performance.

Features

- Strong and reliable performance
- Smooth start and stop
- Suitable for low-rise buildings
- Cost-effective solution
- Easy installation and maintenance

Specifications

- Capacity: 2–10 Tons / 2–15 Persons
- Speed: Up to 1.0 m/s
- Door: Manual / Automatic

Applications

- Villas
- Warehouses
- Industrial units
- Small commercial buildings

Safety

- Emergency lowering system
- Overload protection
- Door safety features
- Power backup

2.4 Hospital Bed Lifts

Kranthi Elevators Hospital Bed Lifts are specially designed for hospitals and healthcare facilities to ensure safe, smooth, and comfortable movement of patients, stretchers, and medical equipment. These lifts are spacious, reliable, and operate with minimal vibration to provide a stress-free experience for patients and staff. Built with hygienic materials and advanced safety features, they are ideal for continuous and critical usage.

Features

- Spacious cabin for beds and stretchers
- Smooth and jerk-free operation
- Low noise and vibration
- Hygienic and easy-to-clean interiors
- Durable and reliable performance

Specifications

- Capacity: 10–26 Persons / 800–2000 kg
- Speed: 0.5 to 1.5 m/s
- Door: Automatic (Center Opening)

Applications

- Hospitals
- Nursing homes
- Healthcare centers
- Medical institutes

Safety

- Emergency alarm and intercom
- Automatic rescue device (ARD)
- Overload protection
- Door safety sensors
- Power backup

3. Competitive Edge — Why Choose Kranthi Elevators

- Precision engineering and modern technology applied across every product line.
- Fully customized solutions tailored to each building's structure, space, and requirements.
- End-to-end support — from planning and installation to maintenance and after-sales support.
- Advanced safety features standard across the range: emergency alarms, overload protection, door sensors, automatic rescue devices, and power backup.
- Energy-efficient designs that reduce running costs.
- Experienced, skilled, and punctual technical team.
- Strong track record across residential, commercial, industrial, and healthcare projects.

4. Property Types & Applications Served

Based on the applications listed for each product, Kranthi Elevators serves the following segments:

Residential

- Apartments
- Villas
- Residential communities

Commercial

- Offices
- Shopping complexes
- Hotels
- Small commercial buildings
- Modern constructions

Industrial

- Warehouses
- Industrial units

Healthcare

- Hospitals
- Nursing homes
- Healthcare centers
- Medical institutes

6. FAQ (Optimized for Chatbot Retrieval)

GENERAL FAQs

Q1: What products does Kranthi Elevators offer?

A: Kranthi Elevators offers 4 core product lines: Passenger Lift, MRL Lifts (Machine Room Less Lifts), Hydraulic Lifts, and Hospital Bed Lifts.

Q2: What does Kranthi Elevators do?

A: Kranthi Elevators designs, manufactures, and installs elevators for residential, commercial, and healthcare buildings, and provides ongoing maintenance and support.

Q3: Where is Kranthi Elevators located?

A: Kranthi Elevators is based in Hyderabad, at Plot No 68/A, H. No 8-234, New Vivekananda Nagar, Chinthal, Qutubullalur – 500055.

Q4: What kind of buildings does Kranthi Elevators work with?

A: Kranthi Elevators works with residential apartments, villas, offices, shopping complexes, hotels, warehouses, industrial units, hospitals, nursing homes, and other healthcare facilities.

Q5: Does Kranthi Elevators only sell lifts, or also maintain them?

A: Kranthi Elevators supports the entire elevator lifecycle — planning, installation, maintenance, and support.

Q6: What safety features come with Kranthi Elevators' products?

A: Depending on the product, safety features include emergency alarms, overload protection, door sensors, automatic rescue devices, emergency lowering systems, and power backup.

Q7: Are Kranthi Elevators' lifts customizable?

A: Yes. Every solution is customized to suit the structure, space, and requirements of the client.

Q8: Does Kranthi Elevators offer energy-efficient lifts?

A: Yes. Energy efficiency is highlighted as a feature across the Passenger Lift, MRL Lift, and other product lines.

Q9: Who installs and maintains the elevators?

A: Kranthi Elevators' team of experienced professionals handles planning, installation, maintenance, and support.

Q10: Does Kranthi Elevators serve hospitals?

A: Yes. Kranthi Elevators offers Hospital Bed Lifts specifically designed for hospitals, nursing homes, healthcare centers, and medical institutes.

Q11: Does Kranthi Elevators serve industrial or warehouse buildings?

A: Yes. Hydraulic Lifts are offered for villas, warehouses, industrial units, and small commercial buildings.

SERVICE 1 — PASSENGER LIFT

Q1: What is a Passenger Lift from Kranthi Elevators?

A: It is a lift designed for safe, smooth, and comfortable vertical transportation in residential and commercial buildings, built with quality components and modern technology.

Q2: What is the passenger capacity of a Passenger Lift?

A: Passenger Lifts are available in a capacity range of 4–20 persons.

Q3: How fast do Passenger Lifts run?

A: Speed ranges from 0.5 to 2.0 m/s, depending on configuration.

Q4: What door types are available?

A: Both automatic and manual door options are available.

Q5: Where are Passenger Lifts typically used?

A: Common applications include apartments, offices, shopping complexes, and hotels.

Q6: What safety features does the Passenger Lift include?

A: It includes an emergency alarm, overload protection, door sensors, and power backup.

Q7: Is the Passenger Lift cabin customizable?

A: Yes. Kranthi Elevators offers customizable options and a modern cabin design.

Q8: Is the Passenger Lift suitable for daily heavy use?

A: Yes. It is built for smooth, low-noise, and reliable daily operation with long-lasting durability.

SERVICE 2 — MRL LIFTS (MACHINE ROOM LESS)

Q1: What is an MRL Lift?

A: An MRL (Machine Room Less) Lift integrates all major components within the lift shaft, eliminating the need for a separate machine room.

Q2: Why choose an MRL Lift?

A: MRL Lifts save building space, offer energy efficiency, lower construction cost, and are ideal for modern buildings with limited space.

Q3: What is the capacity of an MRL Lift?

A: MRL Lifts are available in a capacity range of 4–16 persons.

Q4: How fast do MRL Lifts run?

A: Speed ranges from 0.5 to 1.75 m/s.

Q5: What door type do MRL Lifts use?

A: MRL Lifts use automatic doors.

Q6: Where are MRL Lifts typically used?

A: Common applications include residential apartments, small commercial buildings, and modern constructions.

Q7: What safety features does the MRL Lift include?

A: It includes an emergency alarm, overload protection, door sensors, and an automatic rescue device (ARD).

Q8: Do MRL Lifts require much maintenance?

A: No. MRL Lifts are designed for low maintenance alongside smooth and quiet operation.

SERVICE 3 — HYDRAULIC LIFTS

Q1: What is a Hydraulic Lift?

A: A Hydraulic Lift uses hydraulic technology to provide smooth lifting with strong load capacity, best suited for low-rise buildings.

Q2: What is the capacity of a Hydraulic Lift?

A: Hydraulic Lifts are available in a capacity range of 2–10 tons or 2–15 persons.

Q3: How fast do Hydraulic Lifts run?

A: Hydraulic Lifts run at speeds of up to 1.0 m/s.

Q4: What door types are available for Hydraulic Lifts?

A: Both manual and automatic door options are available.

Q5: Where are Hydraulic Lifts typically used?

A: Common applications include villas, warehouses, industrial units, and small commercial buildings.

Q6: What safety features does the Hydraulic Lift include?

A: It includes an emergency lowering system, overload protection, door safety features, and power backup.

Q7: Are Hydraulic Lifts cost-effective?

A: Yes. Hydraulic Lifts are positioned as a cost-effective, easy-to-install solution where high speed is not required.

Q8: Are Hydraulic Lifts easy to maintain?

A: Yes. Easy installation and maintenance are listed among their key features.

SERVICE 4 — HOSPITAL BED LIFTS

Q1: What is a Hospital Bed Lift?

A: It is a lift specially designed for hospitals and healthcare facilities to safely and smoothly move patients, stretchers, and medical equipment.

Q2: What is the capacity of a Hospital Bed Lift?

A: Hospital Bed Lifts are available in a capacity range of 10–26 persons, or 800–2000 kg.

Q3: How fast do Hospital Bed Lifts run?

A: Speed ranges from 0.5 to 1.5 m/s.

Q4: What door type do Hospital Bed Lifts use?

A: They use automatic, center-opening doors, sized for beds and stretchers.

Q5: Where are Hospital Bed Lifts typically used?

A: Common applications include hospitals, nursing homes, healthcare centers, and medical institutes.

Q6: What safety features does the Hospital Bed Lift include?

A: It includes an emergency alarm and intercom, an automatic rescue device (ARD), overload protection, door safety sensors, and power backup.

Q7: Are Hospital Bed Lifts hygienic?

A: Yes. They are built with hygienic, easy-to-clean interiors suited for continuous, critical healthcare use.

Q8: Are Hospital Bed Lifts smooth for patients?

A: Yes. They are designed for smooth, jerk-free operation with low noise and vibration to reduce patient stress.

PRICING & QUOTATION FAQs

IMPORTANT PRICING RULE: The chatbot must NOT provide, guess, estimate, negotiate, or invent pricing, since no pricing figures are published on the Kranthi Elevators website. When a customer asks about pricing, quotation, cost, charges, rates, or budget, the chatbot should direct the customer to the Kranthi Elevators team via a callback request.

Q1: How much does a Kranthi Elevators lift cost?

A: Pricing depends on the product, capacity, building type, and installation requirements. We will arrange for our team to contact you with pricing details. Please share your preferred date and time for a call.

Q2: What is the price of a Passenger Lift / MRL Lift / Hydraulic Lift / Hospital Bed Lift?

A: Pricing varies by specification and site requirements. We will arrange for our team to contact you with the relevant pricing details. Please share your preferred date and time for a call.

Q3: Can you give me an approximate price or quotation?

A: Our team will provide pricing based on your specific requirements after a consultation. Please share your preferred date and time for a call.

Q4: Is the pricing negotiable?

A: Pricing and commercial terms are handled directly by the Kranthi Elevators team. Please share your preferred date and time for a call so they can discuss this with you.

Q5: Do you offer free consultation or site visits?

A: The website invites customers to call for a consultation; specific details on free site visits should be confirmed directly with the team via a callback request.

Q6: I want someone to call me about pricing.

A: Certainly. We will arrange for our team to contact you regarding pricing and other details. Please share your preferred date and time for a call.

CALLBACK / SALES TEAM HANDLING

Customer asks for a call

A: Sure. We will ask our team to contact you regarding pricing and other details. Please suggest a suitable date and time for a call.

Customer provides a preferred date and time

A: Sure. I've noted your preferred callback date and time. Our team will contact you regarding pricing and other details.

Customer says "Call me anytime"

A: Sure. We will pass your callback request to our team. Please share a preferred date and time so they can reach you at a convenient time.

Customer requests an immediate call

A: Sure. We will pass your request to our team right away. Please share your preferred time for the call.
